

Bogey 22-5 CWP E-blast 2.17.22

RECOA Owners,

Bogey 22-5

This is the next message in a series of updates from CWP. As of end of day today, which is the 17th of February, CWP Hazard Mitigation Grant Program contractors are near completion of the specified fuel reduction treatment on designated areas of the Ridge and Challenge golf courses. Current planning is possibly as early as Friday the 18th of February, to begin work on the 75-foot buffer add-on upslope from Highland View Loop and Sundance Ridge Loop. In any case, we expect the High Terrain to start no later than Monday the 21st of February, weather permitting.

If you have any questions on the information above, please contact CWP@ridgeowners.org.
